

How do I open the gate from my phone?

- Your telephone contact number is recorded into the computer system at the gates. When someone needs entry to visit you they must stop at the call box to enter your address with 4 digits (Zeros in front make up the difference) and **the gate automatically dials** (do not press the “Call” button or the # key). They may look up your name alphabetically by last name paging up and down, then they press the “Call” button. The gate computer then calls your stored contact number. You then **press and HOLD the 9 on the phone keypad until the gate hangs up** so that you know the gate has opened.

Hold the 9 pressed until the gate hangs up.

-If you are using a mobile phone number your guest must still use the call box because the GATE must call you (not your guest). **Press the 9 and hold it until the gate hangs up.** Then you know the gate has opened.

Create a contact on your mobile phone for the North and South gates. A caller ID is not sent by your mobile provider and is noted to you as “unknown” or “unavailable”.

North Gate: 863-258-9619

South Gate: 863-258-4004

By the way: for your lot address / home

-Only one phone number can be registered to an address at the gate computer. We cannot register 2 cell phones or a cell and a land line.
